Comments:	The landing gear indicator anomalies were investigated and it was determined that the gear up and down indications are reliable. Switch contacts were cleaned and wiring checked and the flight launched to check the gear-in-motion light in the handle and caution lights and collect MABEL data. MABEL collected ocean data and lines at Fort A. P. Hill were recorded again. The same gear indication anomalies remain and the plane will ferry back to Palmdale to be corrected on Monday.
