Flight Segments:

From:	PMD	To:	PMD
Date:	09/11/14		
Flight Time:	2 hours		
Purpose of Flight:	Maintenance		
Comments:	High-altitude flight to troubleshoot pressure seal leak on the LH pod seal. A block was input onto the seal to isolate the pressure regulator and seal valves. No leak was discovered during this flight. This eliminates the pressure regulator and valves and their connectors as being the source of the leak. An additional flight or flights will be done to investigate the seal further downstream.
