Funding Source:	Bruce Tagg - NASA - SMD - ESD Airborne Science Program		
Purpose of Flight:	Science		
Comments:	First science data collection flight for APFS and G-LiHT instruments. Flew over a data collection field adjacent to NASA ramp with simultaneous ground truth data being taken, and 4 preplanned data lines in the vicinity of Williamsburg. One line repeated the December ECF line flown with no green vegetation, two intersecting lines mimiced the previous lines over predominantly evergreen forest around a major reservoir, and the final line overflew a significant "cliff-like" land water interface adjacent to previous G-LiHT boresite calibrations.
