

SLAP Local 2021 - B200 - LARC 02/10/21 Science Report

Aircraft: [B200 - LARC](#) (See full schedule)

Date: Wednesday, February 10, 2021

Mission: SLAP Local 2021

Mission Location: Great Dismal Swamp, NC

Mission Summary:

First of three calibration flights to verify instrument operation at an elevated internal temperature to prepare for science flights this summer.

Operated SLAP instrument with radiometer internal calibration set to 50 C.

Departed KLF1 and leveled off at 1000 AGL science altitude. Performed water calibration over Kerr Reservoir. Flew two science lines over Caledonia State Prison Farm, three over the farmland West of Murfreesboro, and four over the farmland south of the Great Dismal Swamp, which contains irrigated and non-irrigated areas in an East-West gradient.

Performed a water calibration over buoys in the Chesapeake Bay Northeast of Hampton, then returned to KLF1.

These lines were repeated in the afternoon flight at an internal calibration set temperature of 45 C.

B200 - LARC 02/10/21

Flight Number: SLAP Temp Cal

Payload Configuration: SLAP

Nav Data Collected: No

Total Flight Time: 5.2 hours

Submitted by: Gregory L. Slover on 02/11/21

Flight Segments:

From:	KLF1	To:	KLF1
Start:	02/10/21 14:58 Z	Finish:	02/10/21 17:34 Z
Flight Time:	2.6 hours		
Log Number:	21B009	PI:	Edward Kim
Funding Source:	Jared Entin - NASA - SMD - ESD Hydrology Program		
Purpose of Flight:	Science		
Miles Flown:	374 miles		
Comments:	This sortie consisted of the AM portion of a SLAP temperature calibration flight. Mission was flown at 1,500' MSL at about -4 to 0 C. A water cal was completed over Kerr Reservoir followed by multiple E-W lines over three different farmland targets. The sortie finished with a water calibration over the Chesapeake Bay Buoy #44072.		

From:	KLF1	To:	KLF1
Start:	02/10/21 19:29 Z	Finish:	02/10/21 22:05 Z
Flight Time:	2.6 hours		
Log Number:	21B009	PI:	Edward Kim
Funding Source:	Jared Entin - NASA - SMD - ESD Hydrology Program		
Purpose of Flight:	Science		
Miles Flown:	375 miles		
Comments:	This sortie consisted of the PM portion of a SLAP temperature calibration flight. Mission was flown at 1,500' MSL at about --2 to +1 C. A water cal was completed over Kerr Reservoir followed by multiple E-W lines over three different farmland targets. The sortie finished with a water calibration over the Chesapeake Bay Buoy #44072.
